

week 09

# What are JS Libraries and how do you use them?

Get students to do this lesson from Khan Academy: <https://www.khanacademy.org/computing/computer-programming/html-css-js/using-js-libraries-in-your-webpage/a/whats-a-js-library> (instead of a lecture).

When finished the lesson get them to do the following 2 things as an activity:

1. Find an open source JS library and add it to a crow-sourced class Replit (shared with class)
2. Add and use that library in a simple replit.
